- 2. Excluding any parking services at an educational institution.

Are charges for street parking at a metered space subject to sales and use tax as parking services?

Yes, charges for street parking are included in the category of parking services subject to sales and use tax beginning Jan. 1, 2023.

Are parking services provided by governmental and nonprofit entities subject to sales and use tax?

Yes, parking services provided by city, county and state governments, along with those provided by nonprofit entities, are taxable. However, any parking services **provided at an educational institution** are expressly excluded from taxation based upon the statutory language of HB 8.

Are charges for storage of a vehicle, RV or boat included in taxable parking services?

No, charges for vehicle or boat storage are outside the scope of parking services subject to sales and use tax.

Are parking service providers required to itemize the sales tax on receipts provided to their customers?

Yes, if customers receive a receipt for their purchase of parking services, the parking service provider must itemize the tax by displaying the amount of sales tax collected on the parking transaction. KRS 139.210(1) requires the retailer to collect the tax from the purchaser and separately display the tax from the sales price, the price advertised in the premises, the marked price, or other price on the sales receipt or other proof of sale. This requirement applies to parking services at meters for street parking, parking lots, parking structures or other locations where the customer receives a receipt and pays electronically by credit card, debit card, phone application, etc.

For parking service charges at coin-only operated meters and cash-only parking lots and structures where receipts are not available to customers, the parking service provider may add the tax to the total amount of the sales price as a single charge to the customer. In these circumstances, the parking service provider must display a statement advising customers that the sales tax is included within the sales price. This guidance is consistent with Kentucky Administrative Regulation 103 KAR 27:180, which addresses vending machine sales.

Are charges for students, staff, faculty or the public to park on a college campus subject to sales and use tax?

No, parking services provided at an educational institution are not taxable.

Are parking services for athletic events occurring off an educational institution's campus subject to sales and use tax?

Yes, these parking service charges are taxable because the parking is not located at an educational institution.

<u>Is parking provided at church parking lots, private residences or other venues included within taxable parking services?</u>

Yes, charges for parking services at these locations are taxable because there are no exclusions provided under the statutory language of HB 8.
